# TeamWherx

Client Custom Fields

Manage your customer database more efficiently than ever with Client Custom Fields. This tool provides even more ways for you to segment information by letting you create your own customized fields for your customers with the Job Dispatching module in TeamWherx™. Use it to easily create new ways to sort through client lists based on custom characteristics you define, and stay even more in tune with your customers' needs.

Key Features

- Create up to 100 custom client fields with the power of this feature.

- Specific types of information can be customized for certain clients.

- Dispatch instructions to mobile employees based on a created custom client field.

Key Benefits

- Track more relevant types of client information to your organization.

- Know more about your customers with new ways to segment them.

- Gain even more customization capabilities within TeamWherx™.
