**TeamWherx**

Asset Tracking

TeamWherx™ puts you in the position to protect your mobile assets. Establish geofences (virtual boundaries) around high-priority assets and be notified if they are moved from within the perimeter. Receive alerts when the status of your asset changes, such as ignition on/off, low battery, or object tampering. Devices can even be set to track faster only when movement is detected, saving battery power when not in use.

< Main   **Job Orders**

Start Time: 3/9/20, 1:00 PM
End Time: 3/9/20, 2:30 PM

Key Features

- A live-view map displays all mobile assets.
- The dashboard provides a summary of information for all devices.
- Run reports on demand or schedule in advance.
- Attach tracking devices to assets without the need for a mobile device.
- Automatically set tracking rates to change frequency based on movement.
- Create custom-defined geofence (virtual boundary) areas.
- Implement customized alerts based on movement, doors open, etc.

Key Benefits

- Maintain visibility of current locations of high-value mobile assets.
- React quickly after being notified when an asset's status changes.
- Reduce losses associated with theft.
- Retrieve stolen property quicker and with a higher success rate.

According to the National Crime Insurance Bureau, the average value of a stolen asset is $22,300.
