WHY WE ARE DIFFERENT

We start with your business needs and work backwards, making sure everything we create for you is:

Easy to implement.

Our solution is designed to easily roll-out across your organization and efficiently on-board your employees.

Easy to use.

Our application is designed with the user experience in mind, so that your employees, dispatchers, and managers can quickly and accurately exchange the information they need.

Easy to integrate.

Our software can import and export data to many different types of third-party systems, making it easy to add into your existing processes (without too much change involved).

Easy to understand.

We offer top-tier support and product knowledge to help you gain the most ROI possible from our platform.

Easy to see.

Comprehensive reports and analytics about your workforce are displayed using parameters you define, so you're always only seeing the most relevant information to your business.

Easy to scale.

We built the application to adapt to your growing business needs, giving you the flexibility to add more users and functionality as your business expands..

All-encompassing.

Unlike many other applications, Actsoft's solution takes an all-in-one approach to workforce management. Our affordable software provides everything you need to enhance your business's productivity and profitability within a single platform.
