

Frequently Asked Questions

What is workforce management software?

Workforce management software helps organizations enhance their productivity and profitability via a collection of digital features that help to automate antiquated processes like paperwork, timekeeping, and work order scheduling.

TeamWherx™, our flagship solution, helps your business become smarter, more efficient, and more successful – regardless of your company's size, industry, or the locations of your employees.

For those organizations with field-based employees, TeamWherx™ empowers deskless team members to spend more time in the field by letting them receive new jobs and complete work orders directly from their devices.

The cost savings and opportunities to increase efficiency and capacity alone for your workforce makes our software worth implementing into your business model.

What features are included in TeamWherx™?

TeamWherx™ offers many different features within a single solution for organizations.

- **Wireless Forms:** Complete your company's documents in a digital format to increase speed, accuracy, cost savings, and detail.
- **Mobile Timekeeping:** Allow your staff to clock in and out from mobile devices (reducing trips to the office and helping to prevent unnecessary overtime).
- **Job Dispatching:** Schedule or assign work orders/tasks to your employees electronically to serve customers more efficiently and maximize productivity.
- **GPS Tracking:** Monitor the locations of employees, work vehicles, assets, and other valuable equipment.
- **Mobile Payments (powered by Stripe):** Give your employees the means to bill for provided services via mobile devices in the field.

In addition to these core features, our software includes additional solutions to help your business make smarter decisions that are backed by real-time data from your workforce and your customers.

Can TeamWherx™ exchange data with my existing software?

TeamWherx™ offers integrations with many different types of third-party software solutions, such as:

Will this platform work for any (or my) industry?
