

Do you know ...

Our **invoice generator forms** help companies calculate work orders' labor and material costs?

- Hourly rates are incorporated to allow for automatic calculation.
- Digital parts lists and related pricing reduces the need to carry and/or access a separate pricing manual.
- Invoices can be generated via a custom integration with the customer's third-party applications.

This kind of form **enables quicker invoicing** while **improving data accuracy** and **accelerating cash flow**.

Form: Example Application

The screenshot shows a mobile application interface for an HVAC invoice. The form is titled "HVAC Invoice" and is divided into several sections:

- Work**: A section header with a horizontal line below it.
- Problem Reported:** A text input field containing "AC unit leaking".
- Filter(s) Size, Type, and Condition:** A text input field containing "13" HEPA".
- Unit(s)**: A section header with a blue icon of three stacked units. Below it is a blue bar indicating "1 entries".
- Work and Cost**: A section header with a blue icon of three stacked units. Below it is a blue bar indicating "2 entries".
- Total Cost:** A text label followed by the value "\$292.95".
- Description of Procedure:** A text input field containing "Tighten L bracket, replace PLT nozzle, clean filter".

At the bottom of the screen, there are three small icons: a blue icon of a hand holding a tool, a blue icon of a hand holding a document, and a blue icon of a hand holding a checkmark.
