Do you know …

Our **barcode scanning** helps companies conduct faster and more accurate inventory management?

- Employees can use their mobile devices to scan items for efficient data entry.

- Fields can be customized to include specific parts, part numbers, and quantities.

- Managers can access inventory information at any time and also receive alerts on low (or missing) inventory.

Using this real-time capability **minimizes shrinkage** while **ensuring optimal inventory levels are maintained** at all times – and at all sites.

Form: Example Application

11:15

Inventory Used

Add any fields you would like to this section before or after the Parts Used repeatable.

DO NOT edit the Parts Used repeatable.
