

# Example Application

## Do you know ...

The **Custom Lists** feature lets you import large amounts of data into a module from an easy to manage spreadsheet.

- This feature can be used for inventory lists, client lists, job lists, etc.
- The spreadsheet can be updated externally making it easy to update as needed.
- Custom lists can be filtered by a key value such as a part number or job number.
- List item values can be used to populate fields in a custom form.

Custom Lists make managing large lists of data used in forms and other modules easy and time saving.

The screenshot displays a software application window titled "Lawn Care Details" for "LB & Co., Inc.". A warning message states: "Please double check your upload before you import." Below this, the file name "cpsTestListFile\_csv.csv" is shown. The main content is a table titled "Managed Property List" with the following data:

RecId	Property	Model	Date	Type
1	GATEWAY	Areca	1-Jan	RP
2	GATEWAY	Areca	1-Jan	CP
3	GATEWAY	Banyan	2-Feb	RP
4	GATEWAY	Banyan	2-Feb	CP
5	GATEWAY	Dogwood	2-Feb	RP
6	GATEWAY	Dogwood	2-Feb	CP
7	GATEWAY	Elm	2-Mar	RP
8	GATEWAY	Elm	2-Mar	CP
9	GATEWAY	Cypress	2-Mar	RP
10	GATEWAY	Cypress	2-Mar	CP
