

# Example Application

## Do you know ...

The **Recurring Orders** feature allows a customer to set a standing order on a schedule.

- Orders can be set to run daily, weekly, or monthly.
- The feature can be used to set maintenance schedules, service appointments, and daily work order schedules.
- The Recurring Order Template easily facilitates the setup of recurring orders.

The Recurring Orders feature automates your workflows with its set it and forget it capability.

The screenshot shows a web application window titled "Recurring order settings - you are editing new recurrence". The interface is organized into sections:

- Client details:** 10006 N Dale Mabry Hwy, STE 100, Tampa, Florida 33618. Lydia Bohner, lbrandt@actsoft.com, (888)732-6638.
