

# Example Application

## Do you know ...

The **Date/Time Calculations** feature gets the duration of two date/time entries in a form.

- This feature can calculate the duration of two dates, two timestamps, or date/time entries.
- It can be the exact duration or rounded to the parameters the customer chooses.
- After the date time fields are set it is a simple step to create the calculation field.

Date/Time Calculations in forms are easy to use and can be applied anywhere a date/time duration is needed..

The screenshot displays a configuration window for a 'Date/Time Calculations' field. The window is titled 'Lawn Care Details' and shows a form with the following fields and options:

- Field name:** A text input field containing 'Total Time'.
- Field ID:** An empty text input field.
- Actions:** A set of four icons: a document with a plus sign, a trash can, an upward arrow, and a downward arrow.
- Calculation type:** A section titled 'Please select a calculation type:' with two radio buttons: 'Formula' (unselected) and 'From/To' (selected).
- Start field:** A dropdown menu labeled 'Select a start Date/Time field:' with 'Starting Time' selected.
- End field:** A dropdown menu labeled 'Select an end Date/Time field:' with 'Ending Time' selected.
- Rounding options:** A dropdown menu labeled 'Set rounding options:' with a list of options: 'No rounding' (selected), '15 minutes', '30 minutes', and '60 minutes'.
- Buttons:** 'Cancel' and 'Save' buttons at the bottom right.
